THE
JAMAICA ALMANACK:
OR, AN
ASTROLOGICAL DIARY
For the Year of our Lord God, 1673.

Calculated Particularly for the Noble
Island of *JAMAICA*; But is of use to those
that inhabit the *BARBADO'S*, and other ad-
jacent Islands in the *WEST-INDIES*, under
the Dominion of His Majesty of Great *B R I-*
T A I N.

With an Astrological Discourse touching
the growing Greatness of that Excellent,
Temperate, and Fruitful Island: grounded up-
on its Nativity, or the first Moment of Time,
wherein the Valiant *English* became Masters
thereof.

By *JOHN GADBURY*,
Student in Astrology and Physick.

God sometimes imparteth his Light, not only to the unlearned, and to the holy Prophets, but also to those that are versed in Judicial Astrology, making that Instrumental for the confirmation of his inspired Truths. Vide, Apologie for Nostradamus, Cap.6.

London, Printed by *John Darby*, for the Company
of Stationers, 1672.

To the truly Honourable, Valiant, and Success-
ful Gentleman, Sir Thomas Lynch, Knight,
Governour of J A M A I C A S and the Ho-
nourable Sir James Modyford, Col. Cope,
Col. Whitfield, Col. Freeman, Col. Mody-
ford, and the rest of the Magistrates, Coun-
sellours, and Officers there, as well Military
as Civil.

May it please your Honours and Worships,

AS I have been humbly bold to make a Diary for,
and an Astrological Judgement on, the Noble
Island of *Jamaica*; So I could not (without being
guilty of a very great Ingratitude) but dedicate both
the one, and the other, to your generous Patronage
and Censures.

When, in my *Ephemeris, Anno 1671*, I made some
Observations on your happy Country, ye were then
a little suspitious of Disturbance, &c. and many of
yee (my honoured Friends and Patrons) that wished
my Predictions true, could scarcely give credit either
to them, or to me, their unworthy Author. But
Time, the only Confirmor of Verity, and real Dis-
coverer of Falshood and Vanity, hath acquitted you
fully of those Fears, and secured you in a quiet pos-
session of one of the most fruitful Islands in the World.

Jamaica was a Country once so populous, that (as
History tells) in few years time, it lost not less than
sixty thousand people by the *Spaniards*; [but it was
not then possessed by the Valorous and Victorious

The Epistle Dedicatory.

Englisb.] Nor were the Inhabitants in those dayes so happy as to be acquainted with the Art of War; so that it was no wonder a well-disciplin'd Enemy, should so notably prevail against them. It is quite otherwise now, God be blessed. And had then also been, if Fortune would have favoured the *English*-Nation with the keeping of it, after the taking there-of, *Anno 1596*, by that excellent and valiant Gentleman, Sir *Anthony Shirley*, Knight.

Certainly, God Almighty had originally designed this Noble Country, to be, not only Taken, but Possessed, Inhabited, and Improved by the *English*. For it cannot be from Humane Resolution and Contrivance, but by a Superior Warrant of God and Nature, that it hath been more than twice subdued by English Valour; if we consider how far distant *England* is from the *Indies*.

Nor can I otherwayes than really believe, that ye (*Honoured Sirs*) are the Persons, who either by your selves, or in your Posterities, will make good the Prediction of that excellently learned Knight, Sir *Christopher Heydon*, wrote above sixty years fince, viz. *That the Spaniards should be utterly beaten out of the Indies, and that the Gospel should be propagated unto the Southern parts of the World.*

Your Island hath been famous for one *Peter Martyr* already. May it be so for many such, and those as worthily qualified and accomplished as he. And may your Honoured Selves be ever Prosperous and Victorious, as well for your own and Posterities advantage in particular, as for the English Interest in general, is, not only the Prayers, but Confidence of him, who implores your Candid Acceptance and Interpretation of these trivial Papers, and subscribes himself,

(*Honoured Sirs*)

Yours, and Astrologies Servant,

John Gadbury.

To my ever Honoured and Ingenious Mathematical Friends , in the noble Island of *Jamaica* , Colonel *Robert Freeman* , Major *William Beefzon* , Mr. *Samuel Bernard* , Capt. *William Ryves* , Capt. *Header Molesworth* , and Mr. *Thomas Ryves* ; with all other my worthy Friends there, yet unknown to mee.

Honoured Sirs,

THAT I have made this Essay toward an understanding of the Intentions of the Heavens to your happy Country, and not been more large in my Enquiries, is to invite you to supply my defects by your more curious Observations and Pains ; which you cannot but most happily perform, if, at least, ye put but your selves to the trouble thereof.

The Wind (I know) bloweth where it listeth ; but yet is obedient to the Immutable Laws of that Immense Power which made it, and cannot blow at all, unless he vouchsafe to bring it out of his Treasury. And I humbly conceive, (with submission ever to God Almighty, who can commission and statute the Winds as he pleaseth) it cannot but be worth an Enquiry, Whether Saturn doth not as really move the Eastern Winds, and Jupiter the Western, &c. in the Indies, as in England ? and although the Winds be generally Easterly with you, I could wish you would take notice, whether under Saturn's Regency, they be not more duly and constantly so ? and whether (though your greatest Rains fall in May, June, July, August, September, October, November) upon an Opposition or Conjunction with the Sun and Saturn, or any other Apertio Portarum, they be not then most violent ?

The Epistle Dedicatory;

violent? and on the contrary, upon the kind Aspects of the Sun, Jupiter, and Venus, they be not more gentle, mild, and refrigerating? and also, Whether the arising of your Pleiades, Hyades, and Constellated Eagle, &c. (chiefly when any eminent Conjunction or Aspect falls in with them) do not certainly induce Moisture?

I beseech you (my honoured and worthy Friends) to take some notice of these matters, which you may easily do, by keeping a Diary of the Weather; as also of the Effects of your Vernal Ingresses, (which I intend, God permitting me Life, once a Year to present you withal;) and pray ye also observe, together therewith, the Transits, Conjunctions, &c. of the Planets over the prime parts of your Islands Palladium, or Genesis; that they may be preserved by your generous Communication, as well for the advance of Truth in Science, as advantage of your Selves and Country.

Thus, worthy Friends and Countrymen, wishing you all Happiness, and, as so many successful Columbus's, to encrease as well in your Acquaintance with the Influences of the glorious Diamonds of Heaven, as in the Gold and Treasure of the Indies; which (if St. Paul may be credited, Rom. i. 19.) will lead ye certainly unto an enjoyment of that Immortal Treasure, of which Saints and Angels partake in Heaven — I remain,

Brick-Court, by
the Deans-Yard,
Westminster.

To your Honoured Selves, and to the
Truths of Astrologie, a Real
Servant, whilst,

John Gadbury.

The

*The Names of the several GOVERNORS
of JAMAICA, since the taking thereof
by the English, Anno 1655.*

1. **T**He Honourable Col. *D'Oyley*, was Governor thereof, first after its being taken.
 2. The Right Honourable the Lord of *Windsore*, was Governour thereof.
 3. The Honourable Sir *Thomas Modyford*, Knight and Baronet, was Governour of this Noble Island ; And He it was that commanded a general Surveygh to be taken of it, at his own Charge ; and under him it began eminently to flourish.
 4. The Honourable and Valiant Sir *Thomas Lynch*, Knight, succeeded Sir *Thomas Modyford*, and is the present Governour thereof ; and under him hath this gallant Country happily improved.
- K** In my next years Book, I shall (God permitting) give you a more ample Chronology of the *Remarkables* relating to this Noble Island ; together with an Account of the Commodities, and growth thereof.

A Table expressing the Rising and Setting of
the Sun, for every 5 days in the year, in
the Latitude of Jamaica.

First six Moneths.

Some brief Observations on the Nativity of the Noble
Island of Jamaica, as it respects the precise time
in which our Valiant and Courageous Countrymen
took possession of the Standard-Royal from the then
Inhabitants ; who therupon presently yielded to the
Mercy and Power of the English ; This being on
Thursday, May the tenth, 3 hours P.M. Anno 1655.
as I have received it from credible Information.

THe Nativities of places, I confess, are things more rarely minded, than those of Persons : Yet, forasmuch as Kingdoms and Cities are not Eternal, but subject to the Laws and Ordinances of the Heavens and Stars, even as Men, &c. saving that they are generally more durable and lasting, as being (in a fence, and in comparison of Humane kind,) Inanimate ; we reasonably conclude, that they have their Originals, Progresses, and Periods, (although Moving in a greater Circle) as Men and things.

I need not endeavour after proof of a thing so obvious, sith there are hardly any, that have read or heard of *Paradise*, *Troy-Town*, *Babylon*, *Jerusalem*, &c. but do necessarily believe that they all had once beginnings, their times of flourishing, and now are no where to be found, except in the universal Register of God and Nature, and this but in a naked name only. I shall therefore (presuming so conspicuous a Truth, to be by all persons that inherit Reason granted me,) come closely to my intended purpose, which is an Examination of the Nativity of this flourishing Island (whose Longitude is 306 d. 30 m. and Latitude 16 d.)

1. *Astronomically.*
2. *Astrologically.*

To the time given, I find the true place of the Sun in that particular Meridian, by the most Correct Astronomical Tables, to be in 29 d. 18 m. which Ecliptical place, gives the

Right

	The Sun	o.	m.
Right Ascension of Time	57	15	
Mid-heaven	45.	0.	
Add the Quadrant hereunto	102	15.	
Oblique Ascension of the Ascendent	90.	0.	
For the true Cuspis of the Midheaven, whose R. A. is 102 d. 15 m.			
o. m. $\frac{d}{m}$			
Next { Greater 103 3. 12 R. A. 102 15.			
Lesser 101 58. 11 L. A. 101 58.			
I. Diff. I. 5. 1 2. Diff. o. 17.			
If 65 m. give 60 m. what shall 17 m? Answer, 16 m. which added to 5 11 d. (the lesser Ark) makes the Cusp of the Mid- heaven, in the Ecliptique, 5 11 d. 16 m.			
For the Cuspis of the Horoscope, whose O. A. is 192 o. 15 m; and Lat. 16 d.			
d. m. $\frac{d}{m}$			
ext { Greater 192 23. 12 O. A. 192. 15.			
Lesser 191 21. 11 L. A. 191. 21.			
I. Differ I. 2. 1 2. Diff. o. 54.			

Then I say, if 62 m. give 60 m. what will 54 m. give? Answer, 52 m. which added to \approx 11 d. (the lesser Ark) leaves the true Cusp of the Ascendent in Latitude 16 degrees, in \approx 11 d. 52 m.

The Cusps of the Intermeadiate Angles, are obtained truly enough by the Domifying Tables for the Latitude of the Island of *Jamaica* (which are Printed with this *Ephemeris*) as also in my *Ephemerides* for ten yearr to come, lately Publish-ed. And the Figure of Heaven is as followeth.

F		Strong	18	
⊕		Strong	14	

By this Collection of the Fortitudes and Debilities of the Planets, we find that *Jupiter*, *Mars*, *Venus*, and *Mercury*, are Competitors for the Dignity of *Almuten* in this Noble Islands Genefis or Radix. And therefore, according to Natural Causes, in the strength of all these Planetary Influences, will the Inhabitants of this Island eminently shine and flourish. (i. e.) There will be visible among them, the Justice, Goodness, Prudence, and Equity of *Jupiter*; Whence good and wholesome, and encouraging Laws will be made and observed, and so also preserved by them; and this for the confirming, as well as distinguishing of Titles and Proprieties among them, and for the advantage and security of all such as shall Trade or Trafique with them, or come and inhabit there.

And, although it may happen here, as in the best of places it ever hath done, that at the first Conquering and Setling, &c. Power is generally more prevalent and visible, than Adoration and Worship, &c. the better to induce Order and Discipline among them; yet when once they are settled to that degree of Honor and Quiet, (The Heavens naturally portend unto them) Religion will then also shine most gloriously among them, (as it begins already very happily to do) and the knowledge of a Deity will come to be as earnestly, religiously, and zealously owned and asserted in the *Indies*, as now in *England* it self:

Jupiter

Jupiter is strong in earnest. What Countrey more exact and
precise in the Profession of Religion than New-England? which
nevertheles, had not a beginning equal to this gallant Coun-
try: This having been honoured with divers Religious House
in times past, and now begins to be remembred again for good
& trath also been honourted with the Person and Learning of one
of the Eminentest Fathers that our Christian Church can glory in
viz. the Reverend Peter Martyr. So that the Religious Pro-
fessors among us here in *England*, that are not so happy as to be
blessed with a Terrestrial Fortune, may (by Gods blessing) en-
joy both Natural and Divine supplyes in this happy Island, if at
least they will be but industrious. Industry, is the *Via Regia*, to wealth. *The diligent hand maketh rich*, saith *Solomon*.

It is a scandal both to Industry, and Ingenuity also, that ma-
ny persons of good parts, both Corporal and Mental, will ra-
ther chuse to beg, steal, or starve, than to travel beyond Sea,
or, (as we are wont to say) go out of the Smoak of their
Mothers Chimney. Had all people been of this sluggish
temper, where had the Discoveryes, or the Honor of the Famous
Columbus been? How should *England* have boasted of her ever
to be Honour'd *DRAKE*? or *Portugal* of the successful *CA-
BAT*. How knows my timorous Countryman, but that he
may be design'd to Honour his Nation as Eminently as
DRAKE or *CAVENDISH*? And although he be not born
to do it at home he may, (like them) perform it abroad.
Every man is not born to be rich by his Fathers fire-side. The
Significators of his success may be in travelling Moveable Signs
in the Heavens. *Joseph* came to be Lord of *Pharaoh's* Family
by being sold into *Egypt* by his Brethren. Why should we de-
pair of Preferment, when we freely adventure our selves for it
especially, when we are not able to live out of a Prison at home?
What a shaine is it, and how much unbecoming a Man, to live
upon sharking or shifting, or running into other peoples debts,
when they know they are never capable of payment? what is
this but a Legal way of robbery? or at least, a loading of our
Consciences with the guilt of our transgressions, by doing that
to others, which we would not they should to do us; even
against the Royal Commandment of the King of Heaven? and
all this for the promoting of laziness, or fear, not comp-
portable in the least with an *English* Generosity or Spirit.

The same God that hath preserved us in these Northern
parts,

parts, can (by his power) protect us also in the remotest places of the Earth. For he is the Lord and Maker of the Indies, as well as of *England*: And, we distrust his Providence, and deny his Power, when we think or speak otherwise. Possibly God Almighty will not suffer many of us to increase in riches here, that he may thereby try our Activity and Courage, and prove us to the utmost, whether we dare to trust to his power and goodness in Forraign Parts. But, to proceed in the significations of our *Almutens*.

Here will be, not only the Goodness, Justice, &c. of *Jupiter*, but together therewith, the Courage, Confidence, and Success of *Mars*, (and Law and Worship are never better secured and supported, than when Power is prevalent) whence the Sons of this gallant Island will prove an undaunted, Warlike, adventurous and active people, not to be feared or confernated by their Enemies, but, like *Gideons* Souldiers, will prove an Offence and Terror to them, enlarging their Bounds and Territories by their Valor and Prowess, making those Nations and People round about them to tremble at their approach.

If *Mars* well dignified do ever shew, or signify a Warlike, Active, Victorious Person or Nation, &c. surely much more must either of them prove so, when he is in his Exaltation, as in this Cœlestial Figure. This Noble Island must therefore be Warlike, and active, enlarging its Power, and increasing its Substance by the Sword; and will ever by prevailing against their Enemies, and victoring of them, unless when under ill Influences (which will not often be) and those times are known by inspecting the following Table of Directions drawn into particular years.

But now, not only Justice Honor, Religion, and Courage, &c. will be eminent in this fruitful Countrey, from the powerful Influences of *Mars* and *Jupiter*, as you have heard; but from the great strength of *Venus* (the most potent Planet in the Schemm) will they (*sub Deo*) be blessed with Fertility, Pleasures and Delights, in a praise-worthy degree, and a great increase of people for a constancy. Is not *Venus* Lady of the Horoscope? and in Δ unto it, and in Noble reception of her Dispositor, in a Sanguine Sign? I say again, this auspicious Influence of *Venus* will be of excellent signification unto them, and will very much fortifie their courage, and sweeten their inclinations.

tion to Devotion, and Religious Adoration; and conveniently abate of an Anchoretical or Hypocritical severity; which indeed is ever found to favour more of an ill Nature, than of true Religion, and always promotes actions of Honour, teaching men generously How to observe the Golden Rule.

This Influence of *Venus* will be most particularly apparent in the Production of their annual Crops of *Cocao, Sugar, Indico, &c;c*; as well as in an increase of Humane kind. And let not any Astrologers, or others, wonder that I take notice so much of this Nations fertility; for the significations thereof are eminently remarkable. *And Countries have their sterile and fruitful Fates attend them, as well as Persons.*

Lastly, not only *Jupiter, Mars, and Venus*, but *Mercury* also will be concern'd in the Almuten or Government of this Island, and by his great strength in the Genesis thereof, denotes its Inhabitants and Possessors, to be a people both Ingenious and Industrious, as well able to keep as to get, [h ♀ are in Δ , and so are ☽ ♂] to be promoters of Arts and Sciences, and many Mercurial Inventions, great Advancers of Merchandise and Trade all the World over, as well as at home: And many Nations and particular people will be made happy by Traficking with them.

And thus, from the Signification and Power of the Almutes. In this Figure, you have the Genius and Character of this gallant Islands Inhabitants, which shews them to be of Nature and Temper, Action and Inclination,

*Honourable, Just, Pious, Affable,
Courageous, Ingenious, Industrious.*

And so from the Almutes, I come to the Hylech, or *Propagator vita*; And that should be in this Radix, the Ascendant or the Lady thereof, as here posited; chiefly, in regard that neither Luminary is located in Alphabetical places, and therefore incapacitated for such Dignity by the Canons of Astrology.

The Ascendant we find fortified by the presence of that glorious Star *Spica Virginis*, and *Venus* the Lady thereof is posited in the Celestial Twins, *supra Terram*, in a happy reception of her Dispositor, and he Angular, and in Trine of *Saturn*; Astrologically intimating the vigor and spirit of this happy Island to be Great and Powerful, capacitating the Inhabitants thereof for much and glorious action, thereby bringing unto her self,

Government

A Table expressing the Dignities, &c.

Governour, and Magistrates, both Riches and Honour, Fame, and good Report. And this the rather, in regard an Eminent Constellation Culminates, and the Governess of the Medium Celi, is near *Anseris*, and applying *ad trinum Iovis*.

From these beforesaid Arguments (relating to the Hylech) we may be bold to Predict that this Curious Countrey will prove subject but to few Sickneses or Diseases, and those few too, only occasion'd by excess of Pleasure & Plenty, Surfeits, Fevers, Heart-burnings, and the like. Otherwise the people hereof are likely to be a healthful and happy, active and strong people; enabled sufficiently for contending and combating with the greatest difficulties and disturbances, as well *Microcosmal* as *Macrocosmal*, they shall at any time meet withall; making such things Recreations, rather than their prejudice or trouble. And so from the *Hylech*, I come to consider of the *Alchocoden*.

The *Alchocoden* in this *Insular Genesis*, will be the nimble Planet *Mercury*, as having the immediate disposition of *Venus*, Lady of the *Horoscope*, or *Hylech*; and he being in Noble Trine of *Saturn*, (the most Superior of all the Stars, and Author of Diuturnity) and so eminently powerful in the Schemam, as being not only great in the number of Dignities, but in an amicable and Heaven-favouring reception of *Venus*, will, (according to the judgments of Astrologers in these matters) give nearly his greatest years, which in Kingdoms and Countreys &c; are ever to be considered. And those (by the vote of the Ingenious *Cardanus*) are four hundred and fifty.

I will not be positive, that this gallant fertile Countrey shall be and remain so long in the hands and Government of the present Possessors, and Governours; yet, I dare be confident, That it will remain and continue in obedience unto his present Majesty of Great Britain, and to the Crown of England, much longer than *Mercury* his great years, which (according unto our forecited Author) are near an hundred. And this most certain, unless God Almighty please to suspend his power from (the Secondary Causes) the Stars, under which they are so happily signified.

Do ye not see glorious fixed Stars to possess the prime Angles of the Figure? viz. the Midheaven and Horoscope? It is the Opinion of the learned *Ptolomy*, That the fixed Stars design great Honors and Advantages, increase of Preferment and Glory, &c. and this as well to Nations as Persons. *Cyr. Aphr. 36.*

I therefore say again, that the Inhabitants of this Noble Island, sha'l (*Deo permittente*) continue in the Possession thereof, to the honour of the English Nation, advance and advantage of themselves, their Names and Posterities, time long enough, even to the planting the memory of themselves, their Original, and Countrey, in the Indelible Characters of Power and Policy thererain.

Howbeit, I say this, not without opposition and disturbance from their publick enemies, in conjunction (at sometimes) with the treachery of their pretended friends; by reason of the Moon her being in opposition of the Sun, who receives Exaltation in the seventh Angle, and is Lord of the eleventh house, and the envious Planet *Saturn* being located therein, in *platique Quadrata* to them both, together with *Cauda Draconis* there, even on the very Cusp.

Nevertheleſs, the noble Trine of the Sun and *Mars*, (*Mars* being ſo eminently strong) will give them, not only courage and boldness (as before I mentioned) but Potency too, ſufficient to encounter the moſt resolute and powerful Adverſaries they ſhall at any time meet withall or attempt.

And the happy Trine of *Saturn* and *Mercury*, together with the excellent reception of *Venus* and *Mercury*, will ſo much add to, and advance their Natural Policy, Ingenuity, and Industry, ſufficiently enabling them to counterplot their moſt active Enemies, and alſo to a discovery of their moſt subtle, false, and pertidious friends, though acting never ſo ſecretly, mischievously, or clandestinely againſt them, that they ſhall ſcarcely be ever able to injure them, or bring any designs againſt them to maturity.

I aver it, and that from good grounds of Art.—Let but those Noble Persons, whose Honour it is, or ſhall be, to have the Charge and Management of the Government of this *firſtunited Island* [Pardon me good Reader that I call it ſo, for ſo it is without an Hyperbole, as all persons that have either been there, or Traſique thither find it]. As alſo all the inferior Officers, & Magiftrates, thereof; Let them I ſay, be but vigilant and careful to keep peace within themselves, and not take pleasure or glory in the opposition and ruine of one another, upon any preſtence or humour whatſoever, (for *Cauda Draconis*, and *Saturn* both affiſet the *Azadzupan*, or happy Genious, or Fortune of this Countrey) they may, according to the Rules of Astrology,

and the Energy of second Causes, be Masters and Governors of that Plantation, many ages yet to come; possibly beyond the length of its *Alchocoden*, as I before have observed.

The *Alchocodonean* Circle is only signified, to preserve either Nations or Persons such a certain time, and to such a number of years, &c. which they may according to common Causes continue, but that is frequently surpassed both by Nations and Persons, as other things are found to fortifie and strengthen it, as every ingenious Artist knoweth; and many times also, Persons or Nations never reach unto that Circle, but fall very short thereof, *viz.* when Arguments of short life, &c. are obvious. Thus Children are found to dye young, even before the minor years of the least Planet are finished. And contrariwise, some again, (like old *Par*) reach many years beyond the great Number or Circle of the Sun in Humane Life, *viz.* one hundred and twenty; And thus also is it with Kingdoms and Nations.

But of this, and many other secrets in Art and Nature, I intend (God Almighty sparing my unworthy, and (by many) much envied life) to give an Account sufficient in my *Body of Astrology*, which I have so often mentioned, and promised, in many of my Writings, to the sober Student in this difficult Science, to make publick.

In pursuance of my Theam of the *Alchocoden* of this Noble Countrey, I shall in the next place present you with the Directions of the *Hylegiacal* Points to their respective Promitters throughout this Nativity for *one hundred and eighty years*, and make some short Observations farther, and so conclude.

A Table of Directions of the five Hylegiacal Points in
this Nativity.

Finis Tabulae Directionum.

Thus,

Hus have I drawn out all the Directions of the five *Hyle-*
giacal Points to their several Promittors in the Nativity
this Nobe Island, for one hundred and forty years from the
time it first began to be Governed by the English Na-
on.

I would not be mistaken for my serious pains in this uncouth
attempt, (for I think since the Learned *Gauricus* his dayes,
the like hath not been performed, at least as I know of) I do it
not, as if I hereby supposed the Fate of this Gallant Fertile
Country should terminate, in respect of the present Possessors,
the conclusion of those years, believing it to be of much
longer duration unto them, as I have before urged. I have
only done this to shew the ingenious Artists in that Place, a
way how they may, by *Cœlestia Gradation*, discover the
miles and Frowns that shall for ever attend it ; I mean for all
that time it shall be owned by the foregoing Horoscope. And,
I hope the Sons of Art among them will excuse me for proceed-
ing no further ; and, yet, I cannot but acknowledge my self ver-
y much indebted to many worthy Persons in that Noble Coun-
try ; which, since I am uncapable of signifying my Gratitude
so fully as I would at once ; I shall humbly hereby intreat them
to accept thereof in my becoming their *Annual Remem-
brancer*, which I intend (God permitting) constantly to perform,
according to the best of my Power and Skill.

If we may take any Light from great Conjunctions of Plan-
ets, in these matters, as Astrologers very liberally assure us,
then I have this further to add.

That, the Fate of this Fruitful Island is likely to prove
so much the more Eminent and Illustrious, and to spread at
the larger and more Glorious rate, in that the last great Con-
junction of *Saturn* and *Jupiter* in the Fiery Trigon, Cele-
brated October the 10th, Anno 1663, was near the place of
the Moon in this Nativity ; and the place of the Sun in that
Conjunction, was the Ascendent of this Radix ; and the La-
dy

dy of the Ascendent herein, was in the Moons place in that ^{may} ~~year~~
Celestial Congress.

All which is most Admirable to consider, and so ~~happies~~ ^{suffici} harmonizeth therewith, that we must necessarily conclude ^{of} ~~that~~ That a great part of the Glorious Effect depending upon ^{this N} Great Conjunction, must certainly, and in an Eminent Man attend this Gallant Island.

Although the Tables of Directions before-going, plainly enough intimate, the Happy, Indifferent, Infelicitous Years, attending this Noble Province, I here acquaint you with the several Years of Success and Prosperity unto them (out of the said Table) for almost hundred years yet to come; and they are these following.

1673, 1674, 1675, 1676, 1677, 1680, 1681, 1682, 1683,
1687, 1692, 1693, 1694, 1699, 1700, 1704, 1714, 17
1720, 1724, 1728, 1731, 1732, 1733, 1737, 1738, 17
1743, 1744, 1745, &c. — In all, or the most of ~~the~~ ^{years,} the Generous Inhabitants of this Fertile Island make Eminent Additions to their Honour and Fame, an Improvement of the Commodities of their Countrey; (*by Gods blessing on their Activity and Industry*) will, ^{flue} only fortifie themselves against their Enemies, but be ^{use} pable of offending them; and notably enriching themselves ^{by} thereby, and thence be enabled to yield relief and succour ^{to} their necessitated Friends and Allyes. — And, it is, indeed, ^{at T} a kind of Justice that is thus promised unto them by the Heaven and Stars; The English Nation having been by their ^E, ^S Allies barbarously treated, as well in the Indies, as in ^{the} ^{Sh} nearer home.

Having thus (*by Gods assistance*) run through the significations of the Grand Parts of this Celestial Figure, Viz.

The *Almutens.*

The *Hylech*, and

The *Alchotoden.* —

may now be expected that I should say something to their
also. But, I leave the Disquisition thereof to the
natives of this Fertile and Flourishing Countrey, who cannot
sufficiently torment themselves with the thoughts or study
of ; And here will conclude my this Years Observations
on this Noble Island.

Soli Deo Gloria.

Advertisement.

*πυρετολογία : Or, A Rational Account of the
Uses and Cures of AGUES, &c. an Ingenious
Physical Discourse, of Practical Concernment
to Physicians, and to all Persons labouring under
Tormenting Disease. Written by Robert Tal-
ber, Student in Physick; and sold by R. Robinson, at
his Shop near Grays-Inn Gate in Holborn.*

Advertisements.

A New Map or Description of the Noble Island
of *Jamaica*; and, another of the whole Em-
pire belonging to His Sacred Majesty of Great Bri-
tain

tain in the West-Indies ; together with all sorts
Maps, Charts, Sea-Plats, Globes, Coelestial and Ter-
restrial, and Books explaining the use of them, Made
and Sold by Mr. Joseph Moxon, (Hydrographer
to the Kings Most Excellent Majesty) at his Shop
on Ludgate-Hill, at the Sign of *Atlas*.

The *Fiery Trigon* revived ; by the five Oppo-
sitions of *Saturn* and *Jupiter*, in the years 1672,
1673, Declaring the manifold Miseries they Men-
te to the Dutch Nation ; which Proud People
now in their Grand Climacterical year. By
Trig Gentleman, Student in Physick and Astrology.
Printed for Mr. Josiah Robinson, at his Shop at
colns-Ilm-Gate, next unto Chancery-Lane.

An Ephemerides of the Coelestial Motions (by
Author of this Book,) for ten years, commen-
ciing Anno 1672. where the Industrious Mr. W.
Expired, Printed for, and sold by the Company
Stationers.

A Philosophical Essay, proving all Bodies
have their Original from Water and Seeds ; when
occasion is taken to Dilucidate the Doctrine
Petrification in the Greater World, thereby shew-
ing how that tormenting Disease the *STONE*
generated in the Body of Man. Being an Intro-
ductory Discourse to another, concerning the C

of the *STONE*. By Dr. Thomas Sherley, Physician in Ordinary to the Kings Most Excellent Majestie ; Sold by William Cadman Bookseller at his Shop in the New Exchange.

Postscript ad Lectorem.

Although I have taken this particular pains upon me, for the use of my Honored Friends and Countrymen in the West-Indies ; I do not intend to omit my Annual accustomed labours for my Native Countrey. My Genius (*blessed be God*) is not flagg'd so low, but that I am very well able to perform this accidental service, and my wonted duty together. I have many Truths to install, and some Errors to retract, and these are things not to be done by a sleeping Pen. I have also, many Friends to whom I am obliged *Annually* to make my Appearance, except I le run the hazzard of having my *Epitaph* written before I am dead. I have Enemies too, though not of my own making ; I shall therefore leave them to their fate, and resolve to serve my Countrey in the best manner I am able,

God

God preserve His Majesty, and give Victory to his Armies; Let the Nobility, Clergy, Gentry, and Commonalty of England flourish; and may the variety of Opinions among us be brought into Unity, to God's Glory, the Kingdoms and Churches Good, is the Fervent Cordial Prayer of him, who is an earnest implorer of Englands Peace and Welfare,

Brick-Court by
the Deans-Yard

Westminster.

John Gadbury.
